Subject: County airport expansion

We support a plan to modify the existing runway to meet FAA requirements.

Approving the proposed FAA new runway expansion plan that benefits less than 1% of the county residents is irresponsible financial management of our county tax dollars. This recommended FAA project is not a "free lunch"; it burdens the county residents for years to come. If this project was allowed to be voted on by the county residents, it would be defeated by a landslide vote.

In these very difficult times, let's use our future tax dollars for projects that have the biggest benefit for the county residents. All county residents are looking for your leadership and sound financial management in voting on this airport expansion project.
